## Registration Information Carbon Footprint of Products (CFP)

| 1. Pro | 1. Product information  |   |                   |  |  |  |
|--------|---|---|-------------------|--|--|--|
| 1.1    | Registration number   | CR-DG01-15026-A                         | 1.7 Product photo |  |  |  |
| 1.2    | Product name  | Dell Cloud Multifunction Printer H815dw |                   |  |  |  |
| 1.3    | Model name / number   | Dell Cloud Multifunction Printer H815dw |                   |  |  |  |
| 1.4    | Print speed (Letter): 38ppm Paper size: A4 maximum Capable of duplex printing, facsimile, scanning, NFC and Wifi Product Size: 439(W)x438(D)x492(H) (mm) Product weight: 19kg |   | -                 |  |  |  |
| 1.5    | CFP quantification unit   | Per unit product                        |                   |  |  |  |
| 1.6    | CFP release date  | 2015/10/29                              |                   |  |  |  |

| 2. Cor | 2. Company Information         |                                    |  |  |  |
|--------|--------------------------------|------------------------------------|--|--|--|
| 2.1    | Company name (in<br>English)   | FUJIFILM Business Innovation Corp. |  |  |  |
| 2.2    | Phone number (incl. area code) | +81-3-6271-5111                    |  |  |  |

| 3. CFI | . CFP quantification results, and description of CFP decIration |   |                                      |   |  |  |
|--------|---|---|--------------------------------------|---|--|--|
| 3.1    | CFP quantification results                                      | 2,300   | kg-CO2e                              |   |  |  |
|        | Breakdown (by life cycle stage, by process, by flow, etc.)      |   |                                      |   |  |  |
|        | Raw material acquisition<br>stage                               | 130   | kg-CO₂e                              |   |  |  |
| 3.2    | Production stage  | 14  | kg-CO <sub>2</sub> e                 |   |  |  |
| 3.2    | Distribution stage  | 16  | kg-CO <sub>2</sub> e                 |   |  |  |
|        | Use & maintenance stage   | 2,100   | kg-CO₂e                              |   |  |  |
|        | Disposal & recycling stage                                      | 45  | kg-CO <sub>2</sub> e                 |   |  |  |
|        | Value in CFP mark and description of additional info.           |   |                                      |   |  |  |
|        | Value to be stated<br>on the mark                               | <numerial value=""></numerial>  | <unit for="" the="" value=""></unit> |   |  |  |
|        |   | 2,300 kg  | per unit product                     |   |  |  |
| 3.3    | Description of additional info.                                 | *Calculated by the standard Scenario for Printer (EP type)  *CO2 emission in the distribution stage assumes North America as the main sales area.  *Electric power in the use and maintenance stage is evaluated with the public electric-power-consumption rate in North America.  *The CO2 emission due to printing paper is excluded from the use and maintenance stage.  *Print volume is assumed 866,400 sheets. |                                      | Ü |  |  |
| 3.4    | Remarks   | *Print volume: 866,400 sheets *In this scenario, the CO2 emissions from copy papers are estimated 6,700 kg-CO2e at 4.0  |                                      |   |  |  |

| 4. Inte | Interpretation of CFP quantification results |   |  |  |  |  |
|---------|--|---|--|--|--|--|
| 4.1     | •  | CO2 emission in use and maintenance stage is the largest as 91%. It is important to save energy during product usage. The use condition in this scenario can be different from the use condition of the user.  A choice of the use condition (print mode, print conditions and so on) can reduce the CO2 emission during product usage. For example, 513kg-CO2e of the CO2 emissions (approximately 23%) can be reduced if 2-in-1 print is applied to 433,200sheets (50% of print volume).  Primary data is used in the raw material consumption. Secondary data is used in the parts manufacturing process which might not be reflected our own circumstances because it is difficult to collect the data for thousands of the parts. Please understand this result as the rough estimate according to the reason mentioned above. |  |  |  |  |

| 5. Cor | 5. Conditions of quantification    |  |     |                     |          |  |
|--------|------------------------------------|--|-----|---------------------|----------|--|
| 5.1    | Name of approved CFP-PCR           | Imaging input and/or output equipment  | 5.2 | Approved CFP-PCR ID | PA-DG-01 |  |
| 5.3    | Assumptions of secondary data used | Basic secondary data v.1.01 is preferertially used. Available secondary data     |     |                     |          |  |
|        |                                    | (country v.1.04、foreign country v.1.01) is used if the items don't correspond to |     |                     |          |  |
